

CUBIQ[®]

NEW DISC BY
GALFER

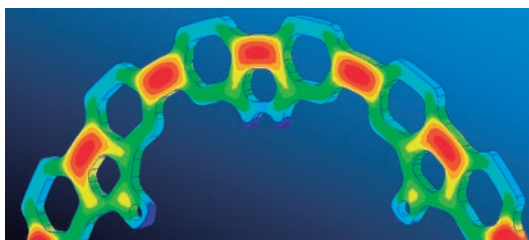

CATALOGUE 2021

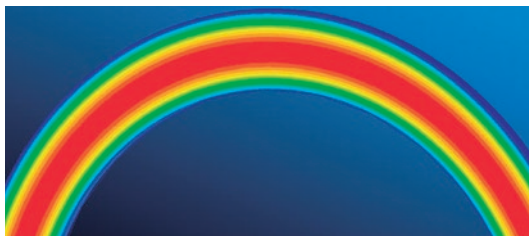

1 COOLING IMPROVEMENT

Increasing the convection perimeter generates more cooling surface around the brake track and a better temperature dissipation.

CUBIQ

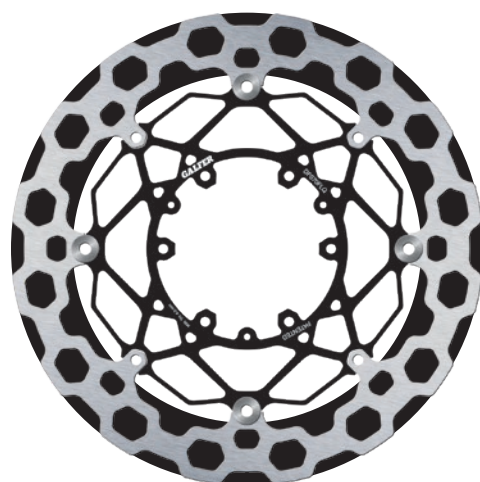

ROUND

2 WEIGHT REDUCTION

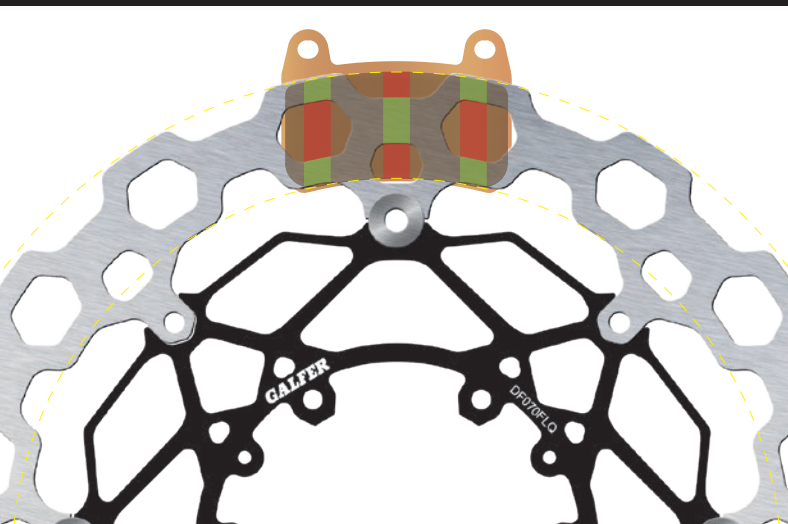

Increasing the cooling surface optimizes the friction surface and enables a lighter brake track design.

3 HOMOGENEOUS BRAKE PADS WEAR

The same contact surface between pad and disc during each turn generates a regular wear out of the brake pads and an homogeneous pressure.

4 DYNAMIC UNBALANCE DECREASE

Having less unsprung mass reduces the gyroscopic effect and improves the maneuverability of the motorcycle.

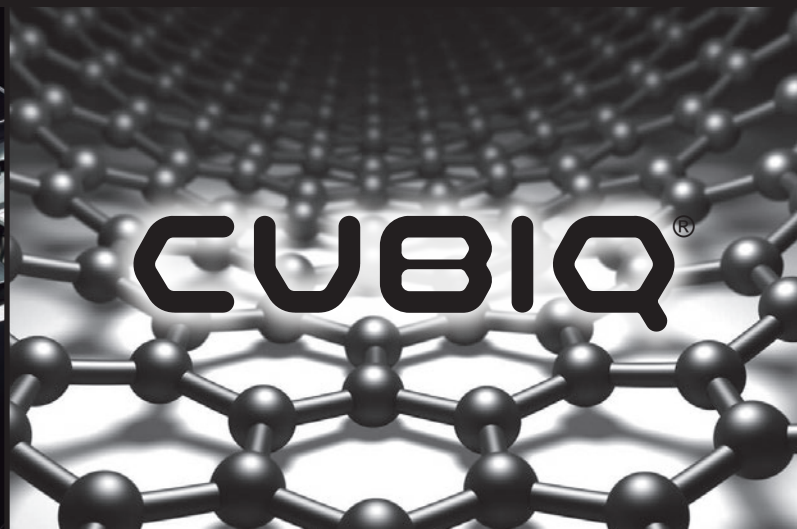

5 STATE OF THE ART TECHNOLOGY

The CUBIQ brake track design is inspired in the latest modern designs and in contemporary elements.

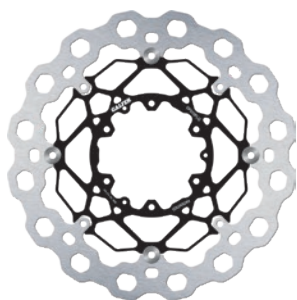

6 NAMED AFTER THE STEEL MOLECULES

The origin of the CUBIQ name comes from the crystal molecules of the steel.

GALFER is a leading manufacturer of friction materials and components for braking systems for the motorcycle and bicycle industry.

Since our company was founded in 1952, we have been known for being at the forefront of innovation, quality and organization. Today we link up our experience and tradition to new technologies, cutting-edge materials and the most advanced management systems.

To stay at the forefront of the market and to gain in-depth knowledge of the industry needs, the R&D department at GALFER works closely with top-level competition teams.

All our products are strictly tested for quality to guarantee its safety. We are so committed with quality regulations that our quality controls exceed the ECE R-90 standards.

GALFER business philosophy is based on the values that led us to become a world leader in braking systems. There's only a thing that our brakes cannot stop: the speed at which we enter the future.
